EDUCATION

MLR Institute of Technology, Dundigal, Hyderabad
B.Tech in Computer Science Engineering (AIML)
Narayana Junior College, Saroor Nagar, Hyderabad
MPC, Telangana State Board of Intermediate Education
Narayana Concept School, Meerpeta, Hyderabad
SSC

2023 - 2027
CGPA: 8.86 (ongoing)
2021 – 2023
Percentage 97.7
2020 - 2021
CGPA: 10.0

SKILLS

Languages	JAVA, SQL, Python
Core Concepts	Data Structures & Algorithms, Object-Oriented Programming
Tools	Excel, PowerPoint, MySQL, Git
Platforms	Jupyter Notebook, Visual Studio Code, Github
Web Development	HTML, CSS, React.js, Flask

Internships

Virtual Intern| Infosys Springboard | [CERTIFICATE](#)

Feb - Apr 2026

- Learned to design and develop full – stack web applications using modern software development practices.
- Strengthened skills in frontend – backend integration, database connectivity, debugging, testing and application deployment.

PROJECTS

Cotton Leaf Disease Prediction with OpenCV| [GITHUB](#) | [LINK](#)

May 2025

- Utilizing Python and OpenCV for image processing and training classification models.
- Goal: To assist farmers in early detection and decision-making, which reduces crop damage and improves yield.

Restaurant Competitor Price Watcher | [GITHUB](#)

March 2026

- Built a full-stack competitor pricing intelligence platform using React, Flask, MySQL, and JWT authentication.
- Integrated automated web scraping with BeautifulSoup and scheduled background monitoring for real-time competitor tracking.
- Implemented analytics dashboard, role-based access control, and intelligent price-drop alerts to support strategic pricing decisions.

Hostel Connect – Automated Hostel Operations Monitoring using Agentic Ai | [GITHUB](#) | [LINK](#)

April 2026

- Implemented role-based access control and dedicated dashboards for Admin, Warden, Student, Security, and Technician users, covering complaints, room allocation, outpass, mess, parcels, and registration management.
- Developed real-time status tracking and operational analytics with secure APIs and modular frontend architecture to improve issue resolution speed, transparency, and decision-making.

CERTIFICATIONS

Agentic AI: AI Agents | [CERTIFICATE](#)

Oct 2025

- Developed a strong foundation in Agentic AI concepts, including autonomous decision-making, task planning, and goal-driven execution.

Python Programming (Cisco Networking Academy) | [CERTIFICATE](#)

Mar 2025

- Developed proficiency in Python programming, including variables, control flow, functions, and data structures and Strengthened problem-solving skills through hands-on coding exercises and logical implementation.

HACKATHONS & WORKSHOPS

- Fire Flow, a technical event conducted by GDGC MLRIT. | [CERTIFICATE](#)
- Code Battle 2K25, a National-Level Hackathon conducted at KLS VDIT. | [CERTIFICATE](#)
- Hack with AI, an AI-focused hackathon conducted at KLH Hyderabad. | [CERTIFICATE](#)
- AWS Cloud Trek Workshop conducted at MLR Institute of Technology (MLRIT). | [CERTIFICATE](#)
