EDUCATION

MLR Institute of Technology, Dundigal, Hyderabad	**2023 - 2027**
B.Tech in Computer Science Engineering (AIML)	CGPA: 8.90 (ongoing)
Narayana Junior College, Saroor Nagar, Hyderabad	**2021 – 2023**
MPC, Telangana State Board of Intermediate Education	Percentage 97.7
Narayana Concept School, Meerpet, Hyderabad	**2020 - 2021**
SSC	CGPA: 10.0

SKILLS

Languages	Python, SQL, JAVA, C
Core Concepts	Data Structures & Algorithms, Object-Oriented Programming
Tools	Excel, PowerPoint, MySQL, SQLite
Platforms	Jupyter Notebook, Visual Studio Code

PROJECTS

Cotton Leaf Disease Prediction with OpenCV| LINK **May 2025**

- Developing a machine learning model to identify and classify diseases in cotton leaves using image datasets.
- Utilizing Python and OpenCV for image processing and training classification models.
- Goal: To assist farmers in early detection and decision-making, which reduces crop damage and improves yield.

Restaurant Competitor Price Watcher | LINK

- Built a full-stack competitor pricing intelligence platform using React, Flask, MySQL, and JWT authentication.
- Integrated automated web scraping with BeautifulSoup and scheduled background monitoring for real-time competitor tracking.
- Implemented analytics dashboard, role-based access control, and intelligent price-drop alerts to support strategic pricing decisions.

CERTIFICATES

Agentic AI : AI Agents | CERTIFICATE **Oct 2025**

- Developed a strong foundation in Agentic AI concepts, including autonomous decision-making, task planning, and goal-driven execution.
- Gained hands-on experience in designing intelligent agents using Python, applying logical reasoning, workflows, and adaptive behaviour techniques.

Oracle Java Foundations (LinkedIn Learning) | CERTIFICATE **Jan 2026**

- Developed a strong foundation in Java programming, covering core concepts such as data types, control flow, and object-oriented principles.
- Gained hands-on experience in writing and debugging Java programs, strengthening logical thinking and problem-solving skills.

Python Programming (Cisco Networking Academy) | CERTIFICATE **Mar 2025**

- Developed proficiency in Python programming, including variables, control flow, functions, and data structures.
- Strengthened problem-solving skills through hands-on coding exercises and logical implementation.

HACKATHONS & WORKSHOPS

- Metaloop 2K23 — 24-Hour AR/VR Hackathon
- FireFlow — 48-Hour Hackathon
- Code Battle 2k25 — 24-Hour National Level Hackathon
- Agentic AI: AI Agents — Workshop & Hands-on Project
- Hack with AI – KLH Hyderabad
