EDUCATION

MLR Institute of Technology, Dundigal, Hyderabad
B.Tech in Computer Science Engineering (AIML)
Narayana Junior College, Saroor Nagar, Hyderabad
MPC, Telangana State Board of Intermediate Education
Narayana Concept School, Meerpeta, Hyderabad
SSC

2023 - 2027
CGPA: 8.90 (ongoing)
2021 – 2023
Percentage 97.7
2020 - 2021
CGPA: 10.0

SKILLS

Languages	Python, SQL, JAVA, C
Core Concepts	Data Structures & Algorithms, Object-Oriented Programming
Tools	Excel, PowerPoint, MySQL, SQLite
Platforms	Jupyter Notebook, Visual Studio Code

PROJECTS

- Cotton Leaf Disease Prediction with OpenCV | [GITHUB](#)** **May 2025**
- Developing a machine learning model to identify and classify diseases in cotton leaves using image datasets.
 - Utilizing Python and OpenCV for image processing and training classification models.
 - Goal: To assist farmers in early detection and decision-making, which reduces crop damage and improves yield.
- Restaurant Competitor Price Watcher | [GITHUB](#)** **March 2026**
- Built a full-stack competitor pricing intelligence platform using React, Flask, MySQL, and JWT authentication.
 - Integrated automated web scraping with BeautifulSoup and scheduled background monitoring for real-time competitor tracking.
 - Implemented analytics dashboard, role-based access control, and intelligent price-drop alerts to support strategic pricing decisions.
- Hostel Connect – Automated Hostel Operations Monitoring using Agentic Ai | [GITHUB](#)** **April 2026**
- Built a full-stack hostel operations platform using React, Flask, MySQL, and JWT-based authentication to digitize student housing workflows end-to-end.
 - Implemented role-based access control and dedicated dashboards for Admin, Warden, Student, Security, and Technician users, covering complaints, room allocation, outpass, mess, parcels, and registration management.
 - Developed real-time status tracking and operational analytics with secure APIs and modular frontend architecture to improve issue resolution speed, transparency, and decision-making.

CERTIFICATES

- Agentic AI : AI Agents | [CERTIFICATE](#)** **Oct 2025**
- Developed a strong foundation in Agentic AI concepts, including autonomous decision-making, task planning, and goal-driven execution.
 - Gained hands-on experience in designing intelligent agents using Python, applying logical reasoning, workflows, and adaptive behaviour techniques.
- Python Programming (Cisco Networking Academy) | [CERTIFICATE](#)** **Mar 2025**
- Developed proficiency in Python programming, including variables, control flow, functions, and data structures.
 - Strengthened problem-solving skills through hands-on coding exercises and logical implementation.

HACKATHONS & WORKSHOPS

- Metaloop 2K23 — 24-Hour AR/VR Hackathon
- Code Battle 2k25 — 24-Hour National Level Hackathon
- Agentic AI: AI Agents — Workshop & Hands-on Project
- Hack with AI – KLH Hyderabad
